

Kinesis Advantage2

Comfort You Can Feel

Kinesis has been hand-crafting professional-grade ergonomic keyboards for more than 25 years. The Advantage2 is the latest version of the Kinesis contoured keyboard, featuring time-tested, contoured form-factor designed to address the major risk factors associated with keyboarding for maximum comfort.

Ergonomic Design Features

Split Key Wells

Tenting

Concave Key Wells

Thumb Keys

Split key wells position hands and arms at shoulder width to reduce ulnar deviation.

Tenting elevates the thumbs slightly higher than the pinkies to reduce forearm pronation.

Concave key wells place hands and fingers in a natural, relaxed position to reduce over-extension.

Thumb keypads transfer repetitive key strokes from the weaker pinkies to the stronger thumbs.

Vertical Keys

Palm Supports

Small Footprint

Mechanical Switch

Vertical key layout mirrors the natural motion of your fingers to increase speed and comfort.

Integrated palm supports and cushioned palm pads reduce harmful wrist extension.

A smaller footprint reduces painful mouse over-reach. Numeric 10-key embedded in the right key well.

Low-force key switches provide amazing feel and durability. Choose linear Reds or tactile Browns.
