

Kinesis Freestyle2 Keypad

Low-profile numeric keypad with Freestyle2 styling for 10-key users. Includes convenient Windows hotkeys for Cut, Copy and Paste.

Product code

AC800HPB-us

The Freestyle2 Keypad matches the low-profile design of the Freestyle2 keyboard and utilizes the same low-force, quiet and tactile membrane key switch.

The Freestyle2 keypad allows flexibility in positioning the keypad to the right or left of the keyboard and are perfect for narrow keyboards like the Kinesis Freestyle2, other ten keyless keyboards or in conjunction with your laptop. Use it in any situation where a stand-alone keypad is preferred.

The 2-port USB hub enables you to easily connect other input devices such as mice without having to access USB ports on your computer.

NOTE: You cannot plug the Freestyle2 for Mac keyboard into the keypad's USB port, nor can you do the reverse.
